A: Normally "I want to write my own game" is something a programmer would say, not a game developer. Also, instead of the verb "write", using the noun "book" is better in your context. Your question should read "I want to write a game" I want to write a game This is programming rather than game development (programmer), and it is an action which can be done in programming languages such as "python", "C", or "Java". I want to program a game This is game development (developer), and it is an action which can be done in programming languages such as "C", "java", or "C#". Hollywood stars have been sent into a tizzy over a viral video of a "wild rescue" of a sea lion pup by an Australian tour operator in California waters. Filmed in the Pacific Ocean off the coast of Los Angeles, the clip shows a South African vet in a

Flappy Cello Pitball is a game based on well known Piano Tribute game "Flappy Bird". The game is full of on-screen music, clouds and power-ups. Flappy Pitball will be developed and published by a Taiwanese developer. He is a talented developer who usually release games that are pretty good, with good graphics. With a similar style, this game is going to be really good and will be a huge success. I will update you on how the game is going to be so you don't have to wait much. I've now released the Beta version. This means that you can now download it here. I will be reviewing the feedbacks from everyone and will make my first post for it. If you like the game, support me and let me know! If you have any suggestions on the game, you can also share them here. Notes: The game can be played in both, landscape and portrait mode. The game will have an update and an expansion pack. I plan to add more music and sounds, more power-ups, new modes, etc. I know some of you will find this game difficult, but please be patient and try to beat it. You will find it enjoyable once you get used to it. Have a great time

s and Cisco Technologies Merging to Bring the Future of Client Service Cognizant will control technology from Cisco solutions to build new user experiences through a synergy of services, platforms and direct initiatives designed to provide enterprises with the best client service they have ever received. Cognizant is a global information-technology services firm whose employees and customers have been tapped more than 40 times for special assignments in the U.S. and abroad. The company's clients include some of the world's most admired brands: Procter & Gamble, Nestlé, Pfizer, Merrill Lynch, Alaska Airlines, Hilton Hotels, Sony and, most visibly, AT&T. Today, C. Dean Armstrong, chief executive of Cognizant, said the company's growing expertise in the application of sophisticated technologies like big data will help it lead clients in delivering the right client experience at the right time. "We are amplifying out professional, consulting, business and relationship and customer service," said Armstrong, who is due to present a keynote address Monday at the opening of the IDC AI & Analytics for Sales and Service conference here. "If you are at the table, the odds of getting heard is significantly higher." Armstrong said the combination of digitized customer engagement systems, smart manufacturing systems and cloud-enabled connectivity provides comprehensive "360-degree" analytics and customer experience. Today, the major challenge in service is having the global talent and capability to deliver the services and support the customer for the market, whether the issue is health care, oil and gas, banking or packaged goods, he said. "In the future, mobile will bring the world to the you," Armstrong said. "Today, mobile enables people to improve their personal brand through social media and productivity tools. In the future, there will be a transition to conversational AI, which will be conversational because it will be natural, and the personal experience will be enhanced with chat, voice and video." He added that while mobile has "revolutionized internal

communications," there will be a transition to "digitized personal and professional experiences over a converged network." A Real-Time Data Revolution Cognizant may try to leverage telecom networks for customer engagement. But connecting the dots across the enterprise is not so simple, according to Greg Davis, an analyst at Gartner.
