Download PIC Basic Pro 3.0.7 Full Crack Free Y Combinator S13 Closing Thoughts - hnalic ====== damoncali So, they all manage to get through the 100 questions with a 3.5. When was the last time you heard of a YC company actually publishing a major book? I'm guessing the presence of all these speakers will result in some worthwhile reading material. ~~~ rdl I was thinking of writing one myself, but I've actually written a couple of books, so maybe I'll do that, but not with a YC company. It would be interesting to put together a "How to start a startup" book -- that is, primarily for founders of this cohort, and not necessarily things YC tells you to do -- and also have a "Coming of age" book for high school and college students. ~~~ damoncali I've been meaning to write a kindle book on my time at Avvo. I have a few motivations for doing so: 1) I have a love/hate relationship with Avvo as a company. I like their service, but hate everything else about their business. I'd like to write a book that explains how to run your own business without being distracted by the bullshit that comes with running a business. 2) I keep hearing about how Avvo is killing small law firms. I've no doubt that they are getting some of those cases, but I'd like to write a book about smaller firms trying to compete with larger firms. 3) Avvo is a YC company. If you are a YC company, you are unlikely to be a successful or profitable one. I'd like to write a book that helps start up founders better understand how to make their company profitable. I like #1 and #2 the most. ~~~ rdl I like #3. The huge implicit assumption in #1 is that "running your own business" is only possible for people who have a "legacy" position with a big law firm. ~~~ damoncali Well, Avvo 6d1f23a050
